Mob. No: +91 9560862069

Location — Ghaziabad

PROFESSIONAL SUMMARY

- B.Tech Computer Science (AI & Data Science) undergraduate, Maharaja Agrasen Institute of Technology, Delhi (Graduating 2026), CGPA 9.0.
- Strong focus on Python for data analysis, automation, and problem-solving.
- Experienced with Pandas, NumPy, and Matplotlib to transform raw data into actionable insights through visualization and analytical reporting.
- Skilled in SQL and data-driven techniques, with a growing interest in developing scalable Python-based solutions.
- Adept at data storytelling, statistical analysis, and collaborating with cross-functional teams to deliver insight-driven results.
- Hands-on project experience across machine learning, full-stack web development, and UI/UX design.
- Seeking opportunities to build expertise in Python-centric roles within Data Analytics and Software Development.

TECHNICAL SUMMARY

Languages	• C • Python
Web Technologies & Frameworks	• HTML, CSS, JavaScript • React.js, Node.js
Databases & Backend Services	• MongoDB • MySQL • Firebase
Data Analytics & Visualization	• Machine Learning (scikit-learn, Pandas) • Power BI, Excel, SQL • Dashboard Design
Tools	• GitHub, Git, VS Code
UI/UX Design Tools	• Figma, Framer
Soft Skills	• Analytical Thinking, Problem-Solving • Communication, Time Management, Teamwork

ACADEMIC PROFILE

Graduation	Maharaja Agrasen Institute of Technology, Delhi — Graduated: 2026 Bachelors of Technology - Computer Science Engineering (AI&DS) CGPA: 9.0
CBSE XII	GD Goenka Public School — 94.2% (2022) Achievements: School topper, 90% scholarship
CBSE X	GD Goenka Public School — 97% (2020)

PROJECTS

Database Administration Portal | Python, Streamlit, SQLAlchemy, MySQL

- Developed a secure database management portal with Streamlit, Python, SQLAlchemy and MySQL, supporting authentication and Role-Based Access Control (RBAC).
- Implemented dynamic CRUD operations using SQLAlchemy ORM and schema reflection for reusable database management.
- Added audit logging to track user database activities and integrated AI-powered natural-language database analysis.
- Leveraged OpenAI's API to power the natural-language query assistant, enabling users to interact with the database using plain-English questions.

NeuroVision — Brain Tumor Classification Web App

- Developed a deep learning-based web application for brain tumor classification using CNN models on MRI images.
- Implemented image preprocessing and model training using TensorFlow for accurate predictions.
- Integrated the trained model with a Flask backend and built a responsive UI for real-time image upload and prediction.
- Tech Stack: Python, TensorFlow, Flask, HTML, CSS, OpenCV.

Task Management System Web App

- Developed a full-stack task management system with JWT-based authentication and role-based access control for admins and regular users.
- Designed a responsive UI dashboard using React.js and Material UI, displaying real-time task statistics and summaries.
- Enabled task creation, updates, and filtering by status, priority, and due date, with metadata-driven file upload support (PDFs).
- Containerized the entire application using Docker & Docker Compose for seamless multi-service deployment.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Material UI.

EXTRA-CURRICULAR ACTIVITIES

- **Data Analyst Intern, Easy Solar Solutions** (Jan – Mar 2025) — Analyzed large-scale solar project data to identify trends in energy output, equipment performance, and cost-efficiency. (Stipend: Rs. 15,000)
- **Web Development Intern, Unified Mentor** (Jun – Jul 2024) — Collaborated on full-stack development of real-world projects using HTML, CSS, JavaScript, Node.js, and MongoDB.
- **Web Development Intern, Debound** (Jul – Aug 2024) — Designed and prototyped UI solutions using Figma and Framer for real-world client Indus Insights, enhancing usability through user flows, wireframes, and stakeholder feedback.
- **Micro-Intern, Data Visualization, IBM** (Dec 2023 – Jan 2024) — Built interactive dashboards using IBM tools to analyse trends from large datasets and communicate insights effectively to stakeholders.
- **Data Science Bootcamp Organizer, MAIT AI & DS Dept** (Aug 2024) — Orchestrated a 3-day intensive workshop; facilitated hands-on labs and peer mentoring; commended by faculty.
- **AiVolution Society Member, MAIT CSE-AI** (Jan 2023 – Present) — Led outreach programs and experiential-learning initiatives impacting 200+ students.
- Published IEEE research paper titled "*NeuroVision: A Deep Learning Approach for Brain Tumor Classification*" in the 2025 2nd International Conference on Intelligent Systems for Cybersecurity (ISCS), focusing on applying deep learning techniques for accurate medical image classification.

Workshops & Certifications

- Data Science Workshop, IIT Delhi (Remark Skill).
- Internshala Certified, 3-Month DSA Course (core algorithms & problem-solving).
- Graphs camp by Codeforces Master — solved 3 super hard problems on shortest paths and got featured in Hall of Fame.
