

DB ADMIN PORTAL

Role-Based Database Management System

Coforge

Problem Statement

Traditional database management requires SQL expertise, lacks fine-grained access control, and offers limited auditing for database activities.

Our Solution

A secure web-based Database Administration Portal that simplifies database management

Core Features

- ✓ Secure Login & Authentication
- ✓ Role-Based Access Control (Admin, Editor, Viewer)
- ✓ Dynamic CRUD for Any Database Table
- ✓ Automatic Schema Reflection
- ✓ User & Permission Management
- ✓ Audit Logging & Activity Tracking

Technology Stack

Python

Streamlit

SQLAlchemy ORM

MySQL

Other Libraries: Pandas • bcrypt • Requests
